

## **ADVANCED POWER USA COMMUNITY SOLAR PROGRAM AND GUARANTEE**

### **PLEASE READ FULL DISCLOSURE INFORMATION BELOW**

You are purchasing nothing. Nothing will be installed on your property. Community solar allows residents, small businesses, organizations, municipalities and others to receive credit on their electricity bills for the power produced from their portion of a solar array farm that Advanced Power USA and many partners have built on a plot of land near a power plant substation. You are not directly receiving your electricity from this solar array. Your power still comes directly from the same electric grid and the same utility provider you work with currently and previously. Nothing changes at all with the transfer and delivery of electricity to your home or business. The power from our community solar projects simply adds much needed clean energy to the utility electric grid to help the federal government achieve energy abundance and independence.

Since you are contributing to the clean energy movement, federal and state incentive grants are paid to you as a discount on your electricity bill in the form of kwh credits. When you are billed by your electric utility provider, they bill you based on kwh credits consumed. The price of those credits will be reduced anywhere from 5% to 20%+ all depending on each state's program with community solar projects for residential and business electricity. All entities that pay an electric bill are qualified for this incentive grant discount that will last anywhere from 5 years to 20 years depending on the individual state's program. This program does not cover taxes. It covers only the delivery and supply portions of your bill.

We estimate your portion of the array based on your most recent electricity utility bill showing your full 12 months of annual usage bar graph .

We look at 10 years of NASA sun data and offset based on the year with the least amount of sun. We then set it to around a 90% offset of your yearly kwh consumption provided with your utility bill given. This way you don't over produce and waste credits. This is why we can guarantee yearly savings between 5% to 20% as long as you are subscribed to our community solar state programs. You may cancel service at any time.

We provide yearly follow-ups to all clients with our Energy Quality Audit. This follow-up phone call is to breakdown your yearly savings to ensure you received just like we promised. NO ONE provides better service in the Community Solar Industry than Advanced Power USA! We are the best by far. REMEMBER IT IS A YEARLY SAVINGS PROGRAM! These discounts are not guaranteed monthly but yearly.

Community solar allows for equal access to the economic and environmental benefits of solar energy generation regardless of the physical attributes or ownership of an individual's home or business. In other words, if you can't install solar directly on your property, community solar can be a good option for accessing the savings and other benefits solar provides.

## **GUARANTEE POLICY**

When you sign up for a community solar project, Advanced Power USA guarantees you will save money YEARLY. You will not spend more yearly for your electricity bill. You will save money on your electricity bill yearly by subscribing to our community solar program with your current utility provider vs just being with your current utility provider.

The following list are the exceptions and reasons to why Advanced Power USA would not guarantee yearly savings. If you pay late on your bill you will get late fees from your utility. If you cancel prior to using our service for 1 full year. If you use much less power than what was provided to us when you gave us your utility bill, which we allocate a 90% offset to. If you believe you are using much less power due to MANY recent appliance upgrades, someone using a lot of electricity moving out, or any drastic changes in power usage habits, please contact us IMMEDIATELY so we can adjust your allocation and watch your bills to adjust your offset to your new usage patterns. Your typical usage will most likely not change and these situations are very rare. Just let us know if you feel you are using much less power and we can take a look and adjust things if needed. Most likely, you will be fine unless some drastic change of life habits at home or at your business occurs. The same concept applies if you add an EV or have someone move in who is using more power. Please contact us so we can give you more coverage and more savings guaranteed. Advanced Power USA does not guarantee savings if there are acts of god, war, or anything like Covid that would shut down the way of life as we know it. If that happens the program would just be gone and you would be paying your normal utility provider charges. We also do not guarantee savings if your state changes legislation. If that happens the program would just be gone and you would be paying your normal utility provider charges.

We work with your current utility provider through the state's program vendors. You can always contact us directly at 815-382-6486 and we can help you but we are not the utility provider and we can not offer any assistance if your power is out. Please contact your utility provider for all electricity related questions. All we are doing is giving you that same electricity for less via your state's clean energy incentive grant program through the licensed vendors that serve them.

Thank you.

## **DISCLAIMER FOR COMMERCIAL ACCOUNTS ONLY**

Please let us know if you have any drastic changes to your business as in locations being shut down, downsizing of employees or many recent upgrades of equipment that would create much more efficient electricity consumption.
